Novo Tile Grout: 25 kg bags

DIRECTIONS FOR USE

- All tiles must be securely fixed in place and completely cleaned before **Novo Tile Grout** is applied.
- The gap between tiles should not exceed 4mm.
- The product should not be exposed to moving water during application.
- 4- 5 Liters of water are required for each 25 Kg bag of **Novo Tile Grout** and a slow speed drill fitted with a suitable mixing paddle is recommended.
- Add powder to water and mix until a uniform, lump-free, thick creamy paste is produced, allow stand for ten minutes before use.
- Apply **Novo Tile Grout** to the spaces between the tiles using a sponge or a small piece of soft cloth.
- Pour the mixture into the joints and around the edges.
- Remove surplus material from the face of tiles with a dry cloth and run the tip of a gloved finger or suitable rounded tool along the grout to level it off and form a profile.
- When the grout is dry, clean the tiles with a damp sponge to remove any excess material.

HEALTH AND SAFETY

- **Novo Tile Grout** is non-toxic, non-corrosive and any splashes on the skin should be washed with water.
- If contact with eyes occurs wash well with water immediately and ask for medical advice.
